They are constructed of industrial grade high speed steel and heat treated to assure maximum durability. The UniBit step drill has 3 flatted shanks, which prevents slipping in drill chuck. The multiple steps on each UniBit eliminates the need to maintain a toolbox full of specific size drill bits. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. TJ 3.0 out of 5 stars This is NOT designed to work with smaller 50ml cartridges. The little plastic unit will work with multiple cartridges but this technically will not. I made it work on the 3M 50ml unit by removing the plastic foot from the end of the two closest pressure rods. It works good enough. Even the 3M site shows the image of two different models when you search the part number. The unit is otherwise quite nice.Sure, it is expensive, but this 3M gun does a solid job. I was originally trying to find one locally to borrow or rent, but to no avail.glad I ended up buying it. The gun itself seems to be of a high quality and performed flawlessly. I would recommend this method over welding in most applications and will definitely keep this forfuture use.Recommend it over the cheaper units. We don't share your credit card details with

THUMPER 5.0 out of 5 stars Can you get one for cheaper that works, yes. Do you need this specific gun to use the 3m products, no. With that being said I believe that anyone who does spend the money on this gun, once they hold it in there hand and use it will say ok yeah its worth it. The gun just has a good, quality feel. The finish is great all around so if you want one that looks nice then your set with this. You will feel the quality when you hold it, its a very solid and sturdy piece, not super heavy or anything but definitely sturdy.

All the moving parts are very smooth you are supposed to lube them prior to use, and of course the most important part, it pushes out a perfectly even 11 mix at any quantity you want. Its super easy to clean as well. In my opinion, if this is something you want to last you so you can have it for a long time, this is the gun you want. If you just want one that will get one job done then toss, go ahead and get a cheaper one no problem it will get your job done. I paid for a new item so I should get a new item. I posted some pictures and you can see the residue all over the gun, theres no denying this item is used. Delivery was fast no other complaints so far. I will have to use the gun and update my review later on. The action of the tool is smooth as silk, and makes dispensing material from the cartridges with precision exceptionally simple. It works awesome, very well made. Tips; for related 3m epoxy found on line but not in manual. Suggest getting extra applicators unless youre using it all at once. Keep old applicator in place as a cap seal and replace with new next time. Heat gun cures it fast. No, it was a genuine 3M gun made in China, of course. We replaced sills on my sons car with no fuss thanks to this gun and related glue. Sorry, we failed to record your vote. Please try again Kinda expensive for what it is but 3M adhesives are the best and you need this to dispense them. so bite the bullet. Used to dispense 7333 structural adhesive, worked perfect. Because automobiles can experience significant temperature extremes from bitter cold to blistering hot, its important to use an adhesive thats specially made to handle these rigors. Our adhesive also offers strength to withstand shocks that come from vehicles driving over rough roads. The adhesive also holds strong when exposed to common soap solutions and cleaning products used in cars and boats. This fast curing rate means the item being bonded does not have to be held in place long before it can support itself, which saves the automotive repair technician time and effort. Our all purpose adhesive offers good adhesion to EPDM rubber, plasticized vinyl, metal, glass and other impervious materials. With such versatility, our one glue works for most quick fix gluing needs, reducing the need to stock multiple adhesive products. Also available for Direct Shipment when ordered in case quantities. You can edit your question or post anyway. The 3M Premium Manual Applicator is designed for use with all 3M 200 mL cartridges containing bonding agents requiring a 11 mix.

Each 3M Standard Manual Applicator features heavy duty metal construction and roddriven operation for balanced dispensing from 200 mL cartridges. It is very versatile, suitable for jobs requiring either 11 or 21 mix ratios. For larger jobs, 3M offers a Performance Manual Applicator for use with 400 mL cartridges. A smaller version works with either 50 mL or 37.5 mL cartridges. Featuring smaller sizes, seamless use with 3M cartridges and easily replaceable components such as plungers and mixing nozzles, our manual applicators help technicians become more portable and more versatile without sacrificing quality of work. These applicators are big part of the science that extends your capabilities. heading. Amazon calculates a product's star ratings using a machine learned model instead of a raw data average. The machine learned model takes into account factors including the age of a review, helpfulness votes by customers and whether the reviews are from verified purchases. Please try again later. Easy to use I was very pleased with how easy this was to use and how solid it seemed to operate. I was able to complete the task of installing new clips onto the metal frame of my car to hold down the side windshield plastic cover that goes between the metal frame and the windshield. It was accurate and dispensed well without issues. I went slow on the dispensing of the epoxy. There is no reason I can see why this should cost this much money but you don't have a choice if you want to use the epoxy cartridge. It is a good product, just realize you are being overcharged big time. In my case having the Honda dealer do it would have likely cost me twice as much and I would have the tool so it was still a good deal for me. Sorry, we failed to record your vote. Please try again Can't imagine using the adhesive without the applicator.

Sorry, we failed to record your vote. Please try again Which was the only reason I bought this one. Mine came with 2 identical copies of the same plunger neither of which was the one I'd bought it for. Technically works fine. It's otherwise identical to several generic models available for lower cost here on Amazon. Sorry, we failed to record your vote. Please try again When that happens, the epoxy component is going back up inside the gun mechanism unknown to the user. So you are then using epoxy that is never going to cure. And the gun will end up in the trash along with the cartridge. You just have to be real careful to squeeze gently. 3M said just tell the distributor and get it replaced, but the Amazon sellers have short return limits and will use them to blow off any responsibility to help. It's a good system, but with a design flaw, that requires you to be very careful to avoid learning about the hard way. 3M seemed willing to help but the Amazon sellers just blew it off. Sorry, we failed to record your vote. Please try again Would love to talk to someone about the product but the only options are to return or write a review so here I am. Are the cartridges supposed to be exactly the same. The product is useable but very disappointed! Sorry, we failed to record your vote. Please try again If you're using a high grade industrial epoxy like the 3M line, you need this gun and the mixing tubes. Well worth the investment. Sorry, we failed to record your vote. Please try again Did not function properly or evenly. Ended up taking the mixing nozzle off, and pushing the glue out by hand onto a piece of cardboard, manually mixing, then using a brush to apply. And it was way over priced, even if it had worked. Sorry, we failed to record your vote. For use with both 11 and 21 for 200 mL and 400 mL cartridges and 101 for 250 mL cartridges. For use with both 11 and 21 for 200 mL and 400 mL cartridges and 101 for 250 mL cartridges. Tips sold separately.

For use with both 11 and 21 for 200 mL and 400 mL cartridges and 101 for 250 mL cartridges. Tips sold separately. Requires 200ml EPX applicator gun to dispense. Bringing Better Ideas to the Surface through Science and Innovation In our 3M Industrial Adhesives and Tapes Division, we apply the science of adhesion to deliver innovative solutions that improve the design and manufacturing processes of companies around the world. In the end, our technologies help customers like you deliver competitive products to the market faster and more efficiently. For lower volume applications, choose the 37mL, 45 mL or 50mL dispenser.

Size Description 200 mL Trademark 1 Without Suffix 3M Trademark 2 Without Suffix ScotchWeld Trademark 3 Without Suffix EPX Type Applicator Units Per Case 1 This 3M personal protective equipment Misuse of personal protective equipment may For correct product selection and use, Over the years he's learned what it takes to satisfy a customer. Which, sometimes means going the extra mile literally. In the early 1990s, on a hot summer day in Columbus, OH, Art, then an employee of a local packaging supply company, received a call from a customer who had run out of packaging peanuts and therefore, were unable to ship any orders. With stock located over 100 miles away, his customer was facing a shut down situation. Art recognized the impact this could have on his customer and went to work exploring any and all options. Stock could be delivered the next day, but that wasn't good enough. Art decided to purchase some product from a local competitor and strapped it onto the top of his car. He recalls driving about 25 mph on back roads to his customer's location. Needless to say his customer was extremely happy and was shipping packages with almost no downtime. Art on right going the extra mile for his customer. Art has instilled these same values in everyone here at PacknTape and our everyday activities. You can rest assured our experts will work to understand your business's priorities and processes to ensure you get the products you need, when you need them.
